Consider now the environment surrounding your home and choose, among the following options, the one that best describes the scenery:

- 1 The house overlooks the internal courtyard of an apartment building
 - 2 The house overlooks a heavily urbanized landscape (presence of many apartment buildings and of a high population density, traffic congestion, few trees or green areas, the sky is barely visible)
 - 3 The house overlooks a moderately urbanized landscape (few apartment buildings or in any case there is sufficient distance between one building and another, there are trees and green areas, I can see the sky clearly, there is little traffic in the area)
 - 4 The house overlooks a predominantly natural and slightly urbanized landscape (I don't have buildings that obstruct the view, there is a strong presence of greenery around the house)
